

EARTHWORKS

2001 inc.

2013 Earthworks Update...

We are now going on with 23 years of serving Alberta and Surroundings and with the vast scale of earth retention that is available today and the demand from our clients, Earthworks is excited to announce that once again we will be offering the turnkey retention solutions for most available retention products on the market!

Products such as:

MAGNUMSTONE™

CORNERSTONE® 100

ROSETTA™
WALLS • STEPS • ACCENTS

SienaStone®
segmental retaining wall

These are a few examples of retention solutions that can be used on any size project from back yards to large scale Department of Transport projects. EarthWorks have been specialized in all these areas and wish to give our clients the options they have been asking for.

 **EARTHWORKS** 2001inc.

Earthworks can deliver the highest quality workmanship in the industry while using safe, efficient turnkey retention solutions to achieve all of our client's requirements. We pride ourselves on having the most recent knowledge on product technology and install practices.

For project pricing, design, product overviews, site consultations or any other requirements for your retention projects **please contact us:**
